Short presentation

Jakob Willesen received his degree as Doctor of Veterinary Medicine (DVM) in 1999. Since year 2000 he has worked at the University Hospital for Companion Animals. In 2008 Jakob Willesen was awarded the PhD degree for his work with the French Heartworm (*Angiostrongylus vasorum*) in dogs.

Jakob Willesen's primary work and research are within the field of Internal Medicine in Companion Animals and comprises among others:

Clinical cardiology

Respiratory disease

Cardiopulmonary parasites

Jakob Willesen is also the editor of www.kardiologi.ku.dk

Potential conflict of interest:

Through our university employment we are often in collaboration with veterinary pharmaceutical companies. We have no personal or financial involvement in these projects.

As a private person outside my activities at the university I do, on occasion, give lectures to dog owners, veterinarians or companies as part of their training of employees.
